Ahmed Al-Saidi

Full-Stack Developer | .NET & Angular

ahmedshaaban123321@gmail.com • +201067671981 – +201128785157 • Nasr City, Cairo, Egypt

LinkedIn • GitHub

Profile

Full-Stack Developer with 2 years of experience building scalable web applications using .NET and Angular. Experienced in developing LMS and e-commerce platforms with a focus on clean architecture, performance, and responsive UI/UX. Skilled in modern development practices and Agile teamwork.

Experience

Full-Stack Developer | .NET & Angular at IT-BLOCKS, Nasr City, Cairo — **June 2026 - Present**

- Developed and maintained responsive web applications using Angular, ASP.NET MVC, and Umbraco CMS, contributing to projects including Into Meetings and the National Investment Bank website.
- Built reusable Angular components and optimized application performance through lazy loading, efficient data handling, and database integration with Entity Framework Core and SQL Server.

Frontend Mentor at Elevate Tech, Remote (Part-Time) — **April 2026 - Present**

- Mentored developers in Angular and TypeScript through hands-on projects, code reviews, and practical guidance.
- Improved code quality, problem-solving, and best practices while supporting Agile (SCRUM) workflows.

Frontend Web Developer at Medica Scope, Nasr City, Cairo — **December 2025 - June 2026**

- Developed an enterprise LMS using Angular Standalone and Nx, implementing 10+ core features including role-based access, workflows, dashboards, and dynamic modules.
- Optimized application performance using RxJS, PrimeNG, lazy loading, and reusable components, improving scalability and user experience.

Frontend Web Developer at Develop Network, New Cairo, First Settlement — **June 2025 - December 2025**

- Developed responsive Angular SPAs using reusable components and modern technologies including TypeScript, HTML5, SCSS, Bootstrap, and Tailwind CSS.
- Improved application performance and supported SSR implementation to enhance loading speed and overall user experience.

Projects

Ehjz • Link • Link • Link — **October 2026 - Present**

Ehjz — Service booking platform. Frontend owner for the customer portal, admin dashboard, and vendor dashboard on Angular and Nx. The portal covers search, quote requests, bookings, and payments. The admin and vendor dashboards cover vendors, customers, services, quotations, and finance. Day to day: new features, bug fixes, and UI updates.

Rwaq LMS • Link

Enterprise LMS for managing courses, admissions, user roles, and academic workflows, built with Angular and Nx using a scalable, modular architecture.

Leedo Platform • Link

Angular-based e-commerce platform for NFC-powered profile sharing, featuring 6 customizable themes with a focus on scalability, responsive UI, and performance.

Neuromed Clinics • Link

Responsive Angular website for a neurology healthcare center, showcasing medical services, specialized clinics, and diagnostic solutions with a strong focus on SEO, performance, and responsive design.

Beitseeker • Link

Improved a content-based Angular platform by increasing performance by 30%, resolving reload issues, and implementing dynamic blog and blog details features managed through an admin dashboard.

Arabicbyakram • Link

Built an Angular learning platform with SSR to enhance performance and SEO, integrating Facebook Pixel for analytics and user behavior tracking.

Skills

Frontend: Angular (Standalone, Signals), TypeScript, JavaScript, HTML5, SCSS, Tailwind CSS, Bootstrap, PrimeNG, RxJS, NgRx, Nx

Backend: .NET, ASP.NET Core (Web APIs, MVC), C#, SQL Server, Entity Framework Core, LINQ, SignalR

Architecture & Practices: Clean Architecture, SOLID Principles, Design Patterns, State Management, Modular Architecture, Micro Frontends

Tools & Workflow: Git, GitHub, Jira, Figma, Agile (SCRUM), Nx Monorepo

Other: RESTful APIs, Performance Optimization, Lazy Loading, SSR, Responsive Design, UI/UX Implementation, Mentoring

Internships

Frontend Advanced Bootcamp (Angular) at Elevate Tech **October 2025 - Present**

- Built scalable Angular applications using Clean Architecture, Micro Frontends, Angular Libraries, and NgRx state management.
- Applied SOLID principles, Design Patterns, and unit testing while collaborating in Agile (SCRUM) teams.

Diploma Full Stack Web development (Angular | .NET) at Route **March 2024 - May 2025**

- Built responsive Angular applications and interactive UIs using modern frontend development practices.
- Integrated APIs and contributed to full-stack applications using Angular and .NET.

Education

Bachelor of Management Information Systems (MIS) at Higher Institute of Computers and Management Information Systems, Egypt, Tanta **September 2018 - June 2022**

Grade: A+

Graduation Project: Collaborated in a team to develop an educational platform for the Higher Institute of Administrative Information Systems — Grade: Excellent.

Certificates

Full stack web development diploma from Route · Link **May 2025**

Agile Crash Course for Beginners from udemy · Link **March 2025**

Forward Program from McKinsey & Company · Link **July 2024**

Learning How to Learn from coursera **July 2024**
